SCHEMA BUILDER

| Date	05 November 2025
Team Id	NM2025TMID04354
Project Name	CRM Application for Jewel Management

The Schema Builder visually represents the relationships between Salesforce objects.It helps administrators and developers understand the database architecture and quickly modify relationships or field dependencies.

Key Relationships:

Customer → Order

Order → Jewelry Item

Order → Payment

This tool simplifies system documentation and ensures clarity in database design

User Interface – Lightning App and Page Layouts

The Salesforce Lightning App provides a user-friendly interface to access all jewelry management functions.

Design Highlights:

- Tabs for Customers, Jewelry Items, Orders, Payments, and Reports.

- Customized Lightning Record Pages to show only relevant information for each role.

- Use of Dynamic Forms to hide or show fields based on user role and data status.

- Quick Actions to add new orders or payments from the top navigation bar.

This modular design ensures efficiency, easy navigation, and a professional user experience.
